FOR IMMEDIATE RELEASE:

Commissioner Wayne Carr Named President of Entergy Regional State Committee

GULFPORT, MS (February 10, 2026)— The Mississippi Public Service Commission is proud to announce that Southern District Commissioner Wayne Carr has been selected as President of the Entergy Regional State Committee (E-RSC), a multi-state regulatory body that provides coordinated input on the operations and upgrades of the energy power grid.

The E-RSC is comprised of representatives from the retail regulatory agencies of Arkansas, Louisiana, Mississippi, Texas, and the City of New Orleans. As president, Commissioner Carr will lead collaborative efforts to ensure the reliability, efficiency, and modernization of Entergy's transmission infrastructure across the region.

"Commissioner Carr's confirmation as E-RSC President is a testament to his leadership and dedication to public service," said his fellow Mississippi Public Service Commissioners, Chairman Chris Brown and Commissioner De'Keither Stamps. "We are proud to see Mississippi represented at the helm of this important regional committee."

Additionally, Barton Norfleet, Special Counsel for Federal Energy Affairs at the Mississippi Public Service Commission, will serve as E-RSC Working Group Chair, further strengthening Mississippi's leadership role in regional energy policy and coordination.

In addition to his new role with the E-RSC, Commissioner Carr also serves on the Board of Directors for the Organization of MISO States (OMS), where he contributes to broader regional transmission planning and policy development within the Midcontinent Independent System Operator (MISO) footprint.

"I'm honored to serve as President of the E-RSC and to represent Mississippi in this important role," said Commissioner Carr. "As our region continues to grow, it's critical that we work together to ensure our transmission system is resilient, forward-looking, and responsive to the needs of the people we serve."

Commissioner Carr's leadership in both organizations reflects Mississippi's active role in shaping energy policy and infrastructure across the Southeast.
