SECTION 1 – SCOPE OF WORK

I. Introduction

On June 8, 2021, the Mississippi Public Service Commission ("Commission") granted Great River Utility Operating Company, LLC ("Great River") a certificate of public convenience and necessity to operate as a water and wastewater public utility in Mississippi. To date, the Commission has approved the sale and transfer of 61 wastewater systems and 10 water systems in the state to Great River; before the Commission are 2 pending sale and transfer proceedings of water and wastewater utility systems making up an additional 20 utility systems across the state. All past and present related Great River dockets at the Commission are identified in the Attachment A to this Request for Proposals.

Over the last year, Great River has conducted a "Stabilization Period" where it has continued to operate the acquired water and wastewater systems; Great River has continued to charge the unique Commission-approved rate for each system. In the coming months, Great River will file its first post-acquisition, statewide rate case.

Many, if not all, of the acquired water and wastewater systems are dated. Many of the acquired systems are fully depreciated and in need of capital investment to ensure applicable compliance and produce the provision of adequate utility service in the state. Considering that, the Commission’s approval of the sale and transfer of the to-date 71 water and wastewater systems granted Great River an acquisition adjustment. The Commission’s June 8th Orders in Docket Nos. 2020-UA-143 and 2020-UA-144 provide a longer recitation of the circumstances supporting the granting of an acquisition adjustment.

A condition of Great River’s acceptance of the Commission’s order granting it a certificate of public convenience and necessity was its agreement to pay for an expert to be hired by the Commission to advise the Commission during the first statewide rate case to be filed by Great River after the contemplated Stabilization Period.

The contractor will provide independent consulting services to the Commission during Great River’s first statewide rate case. Great River intends to file a notice of intent in the coming months to change rates pursuant to RP 9 with the Commission to establish statewide rates, charges and service rules and regulations for providing services in Mississippi. The scope of work contemplated in the Request for Proposals includes, but is not limited to the following:

1. Reviewing and summarizing all pre-filed testimony, initial disclosures, supporting evidence, supplemental testimony and supporting evidence, and any of the information filed in the record.

2. Aiding, advising, and assisting the Commission as it evaluates the justness and reasonableness, both to the public and the public utility, of the rates proposed to be charged by Great River.

3. Providing general consulting services to the Commission during Great River’s rate case.

The period of performance of the contract is anticipated to begin immediately after contract execution following the August 2022 Commission Open Meeting and will be conclude following the completion of Great River Utility Operating Company LLC’s rate case.
